※會議說明 Introduction:

近年來,隨著國內外飼主對寵物健康的關注與飼養觀念的轉變,寵物食品注重營養成分及科學實證成為重要國際趨勢。我國農業部去年公告寵物食品管理法草案,盼接軌國際標準以保護寵物健康及消費者權益,並同步營造產業良性發展環境。

本次論壇將於台灣最具規模寵物展期間舉辦,邀集北美、歐洲、日本專家、國內學研單位及產業代表,針對寵物食品開發應如何在科學實證基礎下保障動物福利以強化產品競爭力,將深入探討完全日糧營養標準、輔助性食品發展、及基礎設施建構等議題,期參考國際經驗並促進產官學研民各界交流,公私協力共同強化我國寵物食品產業發展。

In recent years, with the growing attention from pet owners both domestically and internationally towards pet health and the shift in pet care concepts, there has been a significant international trend toward focusing on the nutritional content and scientific evidence of pet food. Last year, Taiwan's Ministry of Agriculture announced a draft of the Pet Food Management Act, aiming to align with international standards to protect pet health and consumer rights, while also fostering a positive development environment for the industry.

This forum will be held during Taiwan's largest pet exhibition, bringing together experts from the North America, Europe, and Japan, along with domestic academic and industry representatives. It will focus on how pet food development can ensure animal welfare based on scientific evidence to enhance product competitiveness. Key sections, including complete and balance pet food nutritional standards, the development of supplementary pet foods, and infrastructure construction, will be thoroughly discussed. The forum seeks to draw from international experiences and promote exchange among government, industry, academia, and the public, in order to strengthen the development of Taiwan's pet food industry through public-private collaboration.
